Overview

Profibus – a real-time industrial network standard. It is based on the physical layer of the serial interface known as RS485. Communication takes place on a master/ slave basis and in this correlation the scale acts as a slave device. The use of the Profibus interface allows RADWAG scales to integrate with older generation automation systems using the Profibus network, which is still widely used in industry.

Profibus is featured in the IM01.EX-4 communication module as well as in MW-01-A4 and MW-04-3 weighing modules, and as an option at an extra charge in PUE HX7 and PUE HY10 terminals.

Compatible with (Additional Fee)

PUE HX7 Weighing Terminal

PUE HY10 Weighing Terminal
