## USB 3.0 Hub

The drawings, photos and graphics used are for illustrative purposes only.

### Overview

The HUB is powered via the USB and does not require driver installation. Simply connect the USB cable to your device and computer and start working. The HUB features surge protection in the event of a short circuit on peripheral devices.

The HUB is equipped with 4 USB 3.0 Plug & Play ports. They make it possible to connect enough necessary devices. The USB 3.0 ports are particularly important for optimum data transfer from a USB 3.0 flash drive.
