Caratteristiche generali

IN/OUT module – semiconductor digital inputs/outputs which can take two binary states: “0” (inactive) or “1” (active). The input ativation performs the assigned function of the scale, for example, zeroing, tare or process start. The output activation informs about the execution of the assigned function, for example, a certain weight threshold exceeding, scale stability or the process continuation.

The IN/OUT module comes for an extra charge in PUE HX7 and PUE HY10 (12 IN/ 12 OUT) terminals.
