Overview

Profinet – an open communication system based on the industrial Ethernet standard. It is a certain combination of features of PROFIBUS DB standard and industrial Ethernet. The Profinet interface application ensures compatibility of RADWAG weighing systems with industrial automation elements of other manufacturers. This approach results in easier and faster scales integration with PLCs, HMI operator panels or industrial robots.

Profinet is featured in the IM01.EX-5 communication module and MW-01-A5 weighing module, and as an option at an extra charge in PUE HX7 and PUE HY10 terminals, and in HRP platforms (and is not included in HRP.EX platforms).

Compatible with (Additional Fee)

PUE HX7 Weighing Terminal

PUE HY10 Weighing Terminal
