

RES Radwag Extended SI Module (PUE HY10) WX-016-0154

The drawings, photos and graphics used are for illustrative purposes only.

Overview

Character communication protocol is designed for communication between RADWAG balance and external device via RS232, Ethernet or Wi-Fi* interfaces. The protocol consists of commands sent from the external device to the balance and responses sent from the balance to the device. Responses are sent from the balance each time a command is received as a response to the command. The commands that make up the communication protocol allow you to obtain information about the status of the balance and ways to influence its operation, for example, they allow you to receive weighing results from the balance, control the display, etc.

Compatible with (Additional Fee)

HY10.HRP.H High Resolution Scale HY10 Multifunctional Scale HY10 H Stainless Steel Multifunctional Scale HY10.HRP High Resolution Scale HY10.H scales for PGC PUE HY10 Weighing Terminal
