Caratteristiche generali

IN/OUT module – semiconductor digital inputs/outputs which can take two binary states: "0" (inactive) or "1" (active). The input ativation performs the assigned function of the scale, for example, zeroing, tare or process start. The output activation informs about the execution of the assigned function, for example, acertain weight threshold exceeding, scale stability or the process continuation.

The IN/OUT module comes for an extra charge in PUE H315 (4 IN/ 4 OUT).
